

Card Safe™

The better memory card protector

Gepe
protecting
memories

Breathtaking moments – valuable memories

You will always find moments and memories in your life worth protecting. Reaching the mountain top, the snapshot of the coolest party of the year, taken with your mobile phone, or the digital video of your child's first steps – even years later we want to look back to them. Or maybe it's the latest song of the trendy newcomer band that you keep on your MP3-Player until they have their first number one hit. In your business life it's valuable data you need to save

for later use or expand the reach of your navigation system.

Much of this data today is stored on digital memory cards. But if the card breaks, memories are only stored inside our heads. How can we then share them with others?

Protect your memories by protecting your memory cards. No matter which kind of card you use (or if it is more than one): Gepe Card Safes™ help you to store and transport you

digital memory cards safely. They are your everyday companion and go with you wherever you go – sometimes even going to extremes. Gepe Card Safes™ are as colourful as your memories. They stick discreetly into your shirt pocket or stick out with trendy colours if carried around the neck.

Choose the Card Safe™ that fits your type and your needs.

Because there are moments we only have once – and want to keep forever.

Because of its small size, the Card Safe™ Mini is your everyday companion. All the same, you can store several different memory cards within. The Mini is especially fit for the smaller types of memory cards such as XD, SD, MMC, RS-MMC, SD-Mini and Memory Stick Duo. This makes it the ideal accessory for your MP3-Player or your mobile phone enabling you to carry home even more mobile phone snapshots or listen to more chart hits on the road. The Mini protects the memory cards against humidity, dust and electrostatic charge. Through its transparent window, you can see at a glance, which memory cards are stored where. Fix the Card Safe with the connector at your camera bag or keep it trendy with a lanyard. With the Mini, you can show your colours: available in unobtrusive onyx, blazing neon or the new trend colours ice blue and rosso, the Card Safe™ Mini fits your individual taste.

Card Safe™ | Basic Slim

The Card Safe™ Basic Slim proves that bigger-sized memory cards can be stored discreetly and safely at the same time – and kept in a shirt pocket or even a small lady's handbag. Because the Basic Slim is indeed the slimmest of all Card Safes™. It has two compartments for memory cards such as Compact Flash, Memory Stick or MMC. Although its being slim, the Card Safe™ Basic Slim offers the full range of features: like the other safes, it offers protection against weather, dust and electrostatic effects. Thanks to its transparent windows, it also helps users to organize the memory cards stored inside.

The Card Safe™ Basic is the allround talent within the Card Safe™ product family. It discreetly stores bigger-sized memory cards such as Compact Flash, Memory Stick or MMC. Thus, the Basic is the ideal accessory for all users of digital photo and video cameras.

Inside the Card Safe™ Basic, memory cards are protected against the weather and dust as well as electrostatic charge. Four compartments offer space for several different memory cards. Through the transparent windows, users can directly see which card is kept in which compartment.

Card Safe™ | Basic Duo

The Basic Duo features two card compartments in which CF, SD, MMC, Memory Stick or Smart Media memory cards can be safely stored.

It ideally fits compact digital cameras, mobile phones with integrated camera and other multimedia devices. The Basic Duo is weatherproof, protects against dust and static charge and has two practical viewing windows. If dropped into water, it automatically floats. Neckstraps can be fixed at the Basic Duo's connector, enabling users to carry it wherever they go: on holiday, downtown, skating or biking. The Basic Duo is available in three trendy colours: onyx, iceblue or mandarin.

Sailing close to the wind or climbing right to the top: the Card Safe™ Extreme is ready for everything. It is the top of the range of all Card Safe™ products. Like all other Card Safes™ it protects memory cards against dust, humidity, shock and electrostatic charge. In addition, it is waterproof according to the IPX-7 waterproof specification – thus fit for the next adventure trip on the ocean or the river. To ensure its outdoor quality, the Extreme has a reinforced hinge with a stainless steel pin and a connector to fix it at the belt or the camera bag. Inside the Card Safe™ Extreme you'll find four compartments for bigger-sized memory cards such as Compact Flash or Memory Stick. The Card Safe™ Extreme adapts to its surrounding in unobtrusive onyx or sticks out in blazing neon. Following current trends, it is now also available in ice blue and rosso.

From the outside, the Card Safe™ Extreme Combi looks exactly like its twin brother, the Card Safe™ Extreme. Inside, you can see the differences: The Extreme Combi has two compartments for bigger-sized memory cards and one compartment to safely store a battery or other smaller parts.

Because: What's the use of living through the best moments if the battery is empty and the backup battery has become wet? The battery compartment is sized 49 x 32 x 10 mm and is suitable for different types of batteries.
